

peaksettings.com

Peak Settings gives users a one-stop shop for finding the best settings for their favorite games, whether it's for performance or for a competitive advantage.

Peak Settings is an ever-growing database of digital game settings. These range from giving the user the best performance for what their system can handle, to giving even the slightest competitive advantage. Users can add their own settings to the database, like other's setups to bring them to the top of the page, and discuss with others about possible changes or better ways to achieve a goal they are trying to achieve with their settings or system.

Personas

Tom is a 26 year-old male professional eSports player. He is specifically looking for settings that allow him to better see his enemies in-game. He is glad to have found Peak Settings because of how simple it is to find the perfect setting scheme that has been recommended by the community.

Gregory is a 32 year-old male that is just getting into PC gaming, and has gotten a low-end system. He is looking to play some games his friends recommended, but is having a hard time running them. Peak Settings helps him find the best settings he can use to get the most quality out of his PC.
